Resolution Number 2026-11-04

A Resolution by the Board of Directors of North Central Solid Waste Authority

A Resolution Establishing Construction and Demolition Waste Rates and Loading Requirements

WHEREAS, the North Central Solid Waste Authority (hereinafter "Authority") is responsible for providing solid waste disposal services and establishing rates and fees for the acceptance and disposal of solid waste; and

WHEREAS, the Authority desires to establish a specific rate for the disposal of construction and demolition waste collected and delivered in roll-off containers; and

WHEREAS, the Authority recognizes the need to establish acceptable material standards and loading requirements to ensure the safe transportation, handling, and disposal of construction and demolition waste; and

NOW, THEREFORE, BE IT RESOLVED

The Authority hereby establishes a construction and demolition (C&D) waste disposal rate and process for accepting C&D waste.

Rate: $200.00 per ton.

The established rate shall apply to roll-off containers containing acceptable construction and demolition materials delivered to the Authority's solid waste facility. The Authority may review and adjust this rate by subsequent resolution.

ACCEPTABLE MATERIALS

The Authority shall accept construction and demolition materials that are accepted for disposal by the County of Santa Fe Landfill, subject to the Authority's operational requirements and applicable laws, regulations, and disposal restrictions.

Acceptance of materials shall be determined by the Authority and shall not include any materials prohibited by applicable law or materials that the Authority is not authorized or equipped to accept.

ROLL-OFF CONTAINER LOADING REQUIREMENTS

All roll-off containers shall be loaded in a manner that allows for the safe transportation, lifting, and unloading of the container.

A. **No Overloading.** Roll-off containers shall not be overloaded. Materials must remain within the container and shall not extend above the container's sides or otherwise interfere with the safe loading, securing, transportation, or unloading of the container.

B. **Heavy Materials.** Heavy construction and demolition materials, including but not limited to concrete, dirt, gravel, tile, brick, rock, and similar materials, must be loaded cautiously and in reasonable quantities. Customers shall take into consideration the weight of the materials and the lifting and hauling capacity of the roll-off truck and equipment.

PASSED AND APPROVED ON THIS DAY 11/19/2026

C. **Weight Limitations.** Customers are responsible for ensuring that the total weight of the materials placed in a roll-off container does not exceed the container's rated capacity, the truck's lifting and hauling capacity, or applicable legal weight limits.

D. **Safe Loading and Pickup.** The Authority reserves the right to refuse to pick up, transport, or accept any roll-off container that is overloaded, excessively heavy, improperly loaded, or otherwise presents a safety concern or risk of damage to equipment. NCSWA shall have the sole and final determination as to whether a roll off container and its contents are safe and acceptable for pickup, transportation, and disposal. The Authority's determination shall be based on safety considerations, equipment limitations, applicable weight restrictions, and operational requirements.

E. **Rejected Loads.** If a roll off container is determined by the Authority to be overfilled, improperly loaded, or otherwise unsafe for pickup or transportation, the Authority may refuse service until the condition has been corrected. The customer shall be solely responsible, at their own expense, for removing excess materials or waste from the container to bring it into compliance with the Authority's loading requirements and to ensure sage transportation. The Authority shall not be responsible for removing, rearranging, or unloading materials to make a container acceptable for pickup. Pickup shall be rescheduled only after the customer has corrected the loading condition and the Authority has determined that the container is safe for transportation.

CUSTOMER RESPONSIBILITY

Customers utilizing roll-off containers for construction and demolition waste are responsible for ensuring that all materials placed in the containers comply with the Authority's material acceptance requirements and loading restrictions. Payment of the applicable disposal rate does not guarantee pickup or acceptance of a container that fails to meet the requirements of this Resolution.

EFFECTIVE DATE

This Resolution shall become effective upon its adoption.

PASSED AND ADOPTED on this 19th day of November, 2026.
