

North Central Solid Waste Authority

POSITION: General Manager
LOCATION: Española, New Mexico
CLOSING DATE: November 30, 2021

General Manager

Under the general policy direction of the NCSWA board, the General Manager plans, organizes, coordinates, and directs the programs and activities of NCSWA. Some of these varied programs and activities include annual budget development, long range planning, personnel functions, facility operations, Transfer Station and Collection Centers management, contract negotiations and management, risk management including environmental health and safety, environmental compliance, member agency support on waste and recycling issues, capital project management, and representation of NCSWA in meetings with public officials, staff from other public agencies, civic groups, media and various contractors. The General Manager must possess the political and business acumen to manage and direct a large, multi-faceted operation serving multiple jurisdictional entities. Should be able to manage grants and identify and apply for funding through state and federal governments and private grants. They can expect to work closely with the community, contractors, franchise haulers, Board of Directors, and staff on various issues and projects

Minimum Qualifications:

A Bachelor's degree in Public Administration, Engineering, Environmental Science, OR related field.

8 (eight) years of experience working at a management level within an organization or company or performing the tasks listed herein.

A combination of education and experience totaling ten (10) years may be substituted as appropriate.
